Abstract (en)
[origin: EP0761586A2] A yarn winding device that processed yarn so it does not separate from the package or be pulled out or catch on parts during the doffing operation. A yarn winding device (1) that winds yarns (Y10,Y1,Y1a) arranged with yarn end processing means (10a,10b) that display the yarn end (Yt) so that the cut yarn end (Yt) does not separate from the package (P).
