Abstract (en)

The present invention is arranged with a removal belt 13, 113 sloping upwards in the tray transport direction, pushes this removal belt in contact with the bobbin 5, 105 on the tray 1, 101 and removes the bobbin from the tray. As a result, the bobbin can be removed by a simple structure involving only one removal belt. Furthermore, as the direction of the bobbin after removal by a single removal belt is undetermined, a guide member 19 and bobbin direction control means 118 by air or the like is arranged.
