Abstract (en)
[origin: EP0761913A1] The partner lock is for accessing locking elements on doors, safes, security equipment or similar. The lock uses a first and a second access key together with a first (9) and a second (14) lock. The second lock is accessed after operation of the first lock with the first key. The second lock is operatable with the second key for admitting the locking and unlocking element. The second lock is accommodated in a housing (1) which is opened via the first lock.
