Abstract (en)  
[origin: EP0648944A1] The invention relates to a plastic connecting element with a retaining region 2 which holds a part and with a fastening region 3 which is to be connected to a support, in particular a motor-vehicle body, provision being made for the tolerance between the part and the support to be compensated for. According to the invention, the retaining region 2 and the fastening region 3 are connected by at least two spiral-shaped elastic arms 6, 7, 8 for compensating for the tolerance in the directions lying in the plane of the support. <IMAGE>
