Abstract (en)

Fluid-carrying duct element having, at its outside in its longitudinal direction, delimiting members (8,15) facing one another at a distance, for generating a flow resistance in the longitudinal direction of the duct element, having, in that space in between, a mouth (9) for connection inwards in the duct element and one or more resistance elements (16) with a space in between in a direction transverse to the longitudinal direction of the duct element, set up for generating a flow resistance in a direction transverse to the longitudinal direction of the duct element and in cooperation, so as to control the fluid flow, with one of the delimiting members. <IMAGE>
