Abstract (en)
[origin: DE19531126C1] A metal pressing is formed with a number of contact elements that are separated after production. The individual contact elements 13-16 are joined 10,11 and are attached to the main metal strip 9 which is fed through a press. Each contact has formed holes 6-8 that are used for fixing into the connector housing of insulating material that has halves that are hinged together by a formed thin formed foil section
