Abstract (en)

[origin: EP0762562A2] The fitting is for use with a number of different types of fluorescent lamps and has a base 1 having features in the form of projections 5,5' that provide a coding for the appropriate socket unit 13. The surface also has a ramp 8 as an additional coding feature. The socket unit has formed slots that match with the projections on the base. Retention of the socket is provided by lugs on the sides 22 and these are engaged by spring clips 19,20 fixed to the base.
