Abstract (en)

[origin: WO9533031A1] A detergent composition surprisingly having improved cleaning performance and improved solubility in aqueous laundering solutions is provided. Specifically, the detergent composition comprises at least 1 % of a surfactant system containing at least one anionic surfactant selected from the group consisting of alkyl benzene sulfonates, alkyl ester sulfonates, alkyl sulfates, alkyl ethoxy sulfates, secondary alkyl sulfates and mixtures thereof. Also included is at least about 0.1 % of oleoyl sarcosinate, wherein the ratio of oleoyl sarcosinate to the surfactant system is from about 1:20 to about 10:1.
