Abstract (en)

[origin: EP0763454A2] Each wheel (13) is located individually in a pinion (14) pivotable around a horizontal cross axis (16). The cross axis of the pinions are located in a common running mechanism frame (1-4) with locators (5) and pref. at least one spring-damping stage for at least one vehicle body. The pinions on both sides of the wheel located in them extend to the cross axis and each wheel in its pinion has bearings on both sides. Each pinion on its free end is fitted in pref. adjustable side guides and is pivotable around the cross axis.
