Abstract (en)
Refuse collection vehicle (1) comprising an essentially box-shaped loading container (3) having a loading opening at the rear of the vehicle, a loading device (5) adjoining the loading container at the rear and provided with a collecting trough (6) and a compression mechanism for moving the waste deposited loosely in the collecting trough into the loading container and simultaneously compressing said waste. At the rear of the vehicle a funnel (13) is attached to the collecting trough. The height of the upper limit edge (20) of the rear wall (15) of the funnel is variable between a plurality of positions. The vehicle is also designed for emptying hopper bins (12). <IMAGE>
