Abstract (en)

[origin: EP0763588A1] The removal of 4-8 C i-alkenes from mixts. of hydrocarbons with the same number of carbon atoms comprises treating the mixts. at 0-30 degrees C and 1-25 bar with a cation exchanger in an H<+> form and separating the treated mixt. into a head prod. free from i-alkenes and a sump prod. contg. the conversion prods. of the i-alkene by distillation.
