Abstract (en)

[origin: EP0763638A1] The window catch has a handle (14) mounted on a support housing (40) and with two coupling rings (52,62) which grip each other axially via two tags (64) diametrically opposite on one ring. The tags move between two stops (55) on the other ring. A locking bolt grips a locking hole (63) in one ring. In the locked position the catch can be moved into a ventilation position but not into the open position. The tags and stops provide a strong, robust coupling which is difficult to force.
