Abstract (en)

[origin: WO9628667A1] A hydraulic clutch control device comprises a clutch fork (25), an operating member (8) for applying a traction onto the clutch fork (25), a hydraulic receiving unit (1) having a fixed cylinder (2) mounted on a support plate (5) and a piston (4) sealingly and slidingly engaged in the cylinder (2) and defining therewith a chamber (6). The operating member (8) extends into the piston (4), which has a tubular shape like the cylinder (2), and is hingedly mounted on the fork (25) and the back end of the piston. The clutch is useful for motor vehicles.
