Abstract (en)
A composition for dust-free paper comprising a polymer composition which contains polymeric substance having glass transition temperature (T_g) in -20 DEG C SIMILAR 70 DEG C range and a polymeric substance having glass transition temperature (T_g) in -65 DEG C SIMILAR 10 DEG C range, where the difference of the glass transition temperatures of these two types of polymeric substances is 30 DEG C or above and the average glass transition temperature (t_g) is in -30 DEG C SIMILAR 20 DEG C range.
