Abstract (en)

[origin: EP0764749A1] The bracket for a window shade frame on the outside of a glass curtain-walled building, consists of a T-shaped plate (20) with a flat base (21) to fix onto a vertical support (4) of the building frame, and a central tongue (23) set perpendicular to the base and made with at least one aperture (24) for a pivot (26) to which the frame (11) is attached. The frame connects with the projecting tongue of the bracket by a forked end (25) fitting on either side of the tongue and has apertures in both sides for the pivot. The bracket also has a seal (31) between the base and an outer pressure strip (17), and it is connected to the frame upright by screws (22).
