Abstract (en)

[origin: WO9600150A1] A machine (20) for the production of a continuous web of honeycomb material (240) comprising a cutting assembly (154) for successively and continuously cutting a sheet of material (27) to which adhesive (230) has been applied into a plurality of strips (238), the adhesive (230) causing the plurality of strips (238) to adhere to each other to form the continuous honeycomb web (240). The sheet of material (27) continuously passes and intermittently bubbles over a curved support (124). A springing assembly (125) urges the sheet of material (27) back against the curved support (124) in response to bubbling of the sheet of material (27) away from the curved support (124).
