Abstract (en)  
[origin: EP0765735A1] The drive arrangement (5,6) incorporates knuckle joint units (15a,b-18a,b) with two on each side of the drive mechanism. The knuckle joint units are connected to at least one plunger (56,57), and each has a first and second guide rod linked by hinge pin (24-27) to the pressure column (28-31). The pressure column on the press housing (23) is movable in the lifting direction of the plunger and is immovable in a direction crosswise to the lifting direction of the plunger. The stamping compartment contains a surface (60) along which the strip runs.
