Abstract (en)

[origin: EP0765932A1] The invention concerns a foam for treating textile fabrics, the foam comprising a fabric softening clay. In a further aspect of the invention the foam may be dispensed from aerosol containers by means of a liquid or gaseous propellant. In this aspect of the invention a packaged product is provided comprising : (i) a foaming detergent composition comprising fabric softening clay; (ii) a propellant; and (iii) a container having a dispensing means, wherein the foaming detergent composition and the propellant are packaged inside the container. In a still further aspect of the invention a method of cleaning and conditioning textile fabrics is provided.
