Abstract (en)  
The invention relates to a window system comprising at least two parallel transparent panels (21,22) mounted in a sash profile (8) surrounding said transparent panels (21,22). Frame parts (20) extending along and supporting the edges of said transparent panels (21,22) have central portions (25,27,28,29) positioned between the edges of said transparent panels (21,22). Said central portions (25,27,28,29) of said frame parts (20) have been provided with grooves (24) wherein are accommodated the edges of a third transparent panel (23) arranged between and parallel to said two first cited transparent panels (21,22). Preferably the two outermost transparent panels (21,22) are glass panels and the third transparent panel (23) is a polycarbonate panel. <IMAGE>
