Abstract (en)

[origin: EP0766131A1] A silver halide photographic material having improved heat sensitivity comprising a red sensitive silver halide emulsion layer the silver halide of which is prepared in the presence of a hexacoordination complex of rhenium, ruthenium or osmium with at least four cyanide ligands and comprising at least about 90 mole percent silver chloride, wherein the emulsion contains a thiosulfonate and a sulfinatate or seleninatate and at least one red sensitizing dye.
