Abstract (en)
[origin: WO9535204A1] A method for forming a corrugated paperboard container and a container made therefrom having a first layer (12) of flat paperboard to which is attached a second layer (14) of contoured paperboard, said contoured layer having a plurality of flutes (16), each said flute including a first flute tip and a second flute tip, the flute rise being substantially vertical at the midpoint between said flute tips, said forming method comprising, placing the corrugated paperboard into a stamping die, the stamping die having a male die and a female cavity shaped in the shape in which the paperboard is to be formed; pressing the paperboard between the die and the cavity to apply a pressure to the paperboard; applying heat to the paperboard simultaneously with said application of pressure; and removing said die from the cavity.
