Abstract (en)
[origin: WO9636091A1] The invention discloses an electric connector (10) of the type comprising an insulating material block (16) which is comprised of a series of cylindrical cavities (22) receiving each one electric contact (24) whose generally cylindrical body comprises an external radial shoulder (46, 50) which faces an end annular radial surface (38) which delimits a reduced diameter section (36) of the cavity (22), characterized in that the portion (44) of the cylindrical body of the contact (24) which is received in the reduced diameter section (36) of the cavity (22) comprises an external radial collar (54) which is radially close-fitted in the section (36).
