Abstract (en)
This invention relates to containers and in particular to containers for viscous liquids such as engine oil. A container generally indicated at 10 comprises a body 11 and a top assembly 12. The body 11 has a generally rectangular cross-section and is the shape of a ship's hull stood on end in its longitudinal section. A re-entrant handle 13 is formed in one of the wide faces 14 such that it generally in line with an outlet 15 and a recess 17.
