Abstract (en)

[origin: EP0767268A1] A condensation laundry dryer which is front-loaded through a loading aperture and closed by a door in the form of a porthole (3) housed in a frame (2) hinged to the front of the machine (1), in which a seal (5) compressed between the porthole and the front of the machine ensures that the door is water-tight and in which a collection chamber (7) is removably suspended from the frame (2) and partially housed in a concave portion of the porthole outside the said machine, the chamber being provided with a filler opening (13) connected, when the door is closed, to a pipe (22) for delivering condensate through a safety valve (23) which is open only if the door is closed and the chamber correctly installed on the door, the chamber being also provided with a breather and overflow opening (14) connected, when the door is closed, to a pipe (37) for collecting overflow in a condensation vessel of the machine. <IMAGE>
