Abstract (en)

[origin: WO9600514A1] The invention concerns a pencil (1) for applying a solid colouring or covering compound (9). The colouring or covering compound (9) is poured in the liquid or paste state into the bore (8) of a sleeve (2) of plastics material which can be cut. The generated surface (10) of the sleeve (2) is tapered conically towards the application tip and the bore (8) in the sleeve (2) is tapered conically towards the end (6) opposite the application tip. The sleeve end (3) at the application tip end is tightly closed by a cap (4) of which the bore (11) is widened conically towards the cap opening and of which the conical part is adapted to the conical part of the generated surface (10) of the sleeve (2).
