Abstract (en)

A compound disposable absorbent article for wearing adjacent a body discharge area having a body facing surface, a garment facing surface, a longitudinal axis, a lateral axis, a primary absorbent member with a length and a width and a secondary absorbent member with a length and a width. The primary absorbent member and the secondary absorbent member have their length each parallel to the longitudinal axis. The secondary absorbent member is closer to the garment facing surface than the primary absorbent member. The primary absorbent member is affixed to the secondary absorbent member by joining means. The width of the secondary absorbent member is preferably equal or greater than the width of the primary absorbent member. The article further comprises a yielding fluid bubble to raise the body facing surface towards the discharge area. <IMAGE>
