Abstract (en)

[origin: EP0768101A1] The two combatants fence on a conducting surface (4). Each combatant wears both a touch detector (1,1'), electrically connected to their sword (2), and a unit (3), which evaluates and signals a valid touch, connected to the conducting surface (4). Each combatant wears footwear (5) with conducting soles, which ensure a good electrical connection between the conducting surface (4) and the detectors (1,1'), or conducting targets (6) attached to each combatant.
