Abstract (en)
[origin: EP0768460A1] Carburettor (1) for an endothermic engine (1a), having a float chamber (3) capable of receiving fuel (2) from an inlet (5) of the carburettor (1) and of feeding fuel (2) to an outlet (6) of the carburettor (1), the inlet (5) being engageable by a first pin (20) which is integral with a floating body (18) contained in the float chamber (3) and the outlet (6) being engageable by a second pin (24) which can be actuated by means of a first device (13) with a cam and rocker, a second device (14) with a cam and rocker being mobile in phase with said first device (13) with a cam and rocker to move a second body (45) inside the float chamber (3) to obtain determinate variations in the level of fuel (2) inside the float chamber (3). <IMAGE>
