Abstract (en)
[origin: WO9600681A1] The invention relates to a ship's hatch cover (2, 2') with the supporting element (5, 5') on the hatch cover side, at least one plain bearing assembly (1, 1'), which also has a supporting element (4, 4') on the coaming side and alignment means, in which the supporting elements (4, 5, 4', 5') lie flat on one another. The special feature of the invention is that the alignment means have adjustable securing means (7) which keep the supporting element (5, 5') on the hatch cover side within a given range of movement on the hatch cover (2, 2') in any position regardless of the force of gravity.
