Abstract (en)

[origin: WO9405904A1] The invention relates to a method and a device for supplying additional air to a combustor in a gas turbine plant with the aid of an additional compressor for additional air, which entails compressing air in the additional compressor and supplying the air to the combustor by passing the compressed air wholly or partially past the ordinary compressor which delivers air to the combustor for pressurizing the combustor and for maintenance of a combustion in the combustor.
