Abstract (en)
[origin: EP0769264A1] The holder has an axis (4) on which is mounted an intermediate part (6) which is fixedly positioned and has in the sliding direction of the door inclined areas (8) extending from a perpendicularly extending area (7) which restricts the roller (3). The intermediate part is supported in the axial direction of the sliding door. It can have a stud (9) projecting into the sliding door.
