Abstract (en)
[origin: DE19538877C1] The bearer is composed of an outer clamp roller (11) and a spaced outer overcoat roller (5) supporting the overcoat (7) with the intermediate arrangement of a cushion layer (6). The clamp roller clamps the inwardly inserted face section (8) of the overcoat. The clamp roller provided at both ends with face flanges is divided in the middle and the two clamp roller sections are provided with a securing component forming an axial connection. The basket roller sections have aligned, smooth inner surfaces and a clamp roller section with an outwardly widened accommodation section.
