Abstract (en)
[origin: EP0769464A2] The connecting wall is fixed at a slope between the fixed side walls (1.1,1.2). The slope is such that the remaining paper in the blast box can slide down over the perforated connecting wall (10). The blast box has reinforcement ridges (11). At least one of the side walls has an opening (12) in front of which is a swivel flap (13) for closing it. the connecting wall above the compressed air connections (1.3) is positioned in the blast box.
