Abstract (en)
[origin: EP0769601A1] The door (1) hinge links (3) are spaced vertically apart and each consists of a link half connected to the door column and to the door. The two link halves are joined by a hinge pin forming a hinge axle. The two link halves of at least one side, door column side and or door side, are joined by a rabbet (6) gripping over the vertical space between the link halves. The two link halves and rabbet are made of one cast part, especially injection moulded part made of light material.
