Abstract (en)

[origin: WO9601899A1] Materials and methods are described for identifying signal transducing molecules which activate promoters, such as the human c-fos proto-oncogene promoter, as well as antagonists of such molecules. Also described are human c-fos promoter activating proteins, and in particular novel proteins, designated CROC-1 protein and CROC-4 protein, nucleic acids encoding said proteins, and mammalian cells transfected with vectors containing such nucleic acids.
