Abstract (en)

[origin: WO9600297A1] Disclosed are human interleukin-1 beta converting enzyme like apoptosis proteases-1 and 2 and DNA (RNA) encoding such polypeptides. Also provided is a procedure for producing such polypeptides by recombinant techniques and antibodies and antagonists/inhibitors against such polypeptides. Also provided are methods of using the polypeptides, for example, as an antitumor agent, and antiviral agent, and antibodies and antagonists/inhibitors against such polypeptides for example, for treating Alzheimer's disease, Parkinson's disease, rheumatoid arthritis and head injury.
