Abstract (en)
[origin: WO9601459A1] A controlling device, in particular for the access of persons to ski lifts or the like, has at least one reading device for portable data carriers carried on persons. The controlling device has a data receiver that receives data from data carriers. According to the invention, the data receiver (5, 9) hangs from a support (10) arranged above the data receiver (5, 9) of the reading device (3, 8), leaving a free space (F) below the data receiver (5, 9).
