Abstract (en)

The carrier is made from a synthetic material, and has a central carrying handle which can be moved between highest and lowest positions. The handle has limbs (24) which engage in the carrier, or the carrier has guides (25) for these limbs, which have a stop (28) which limits the extent of the sliding motion. The stop is able to move, and is spring-loaded. The lower end section of one limb may have one or more slits with parallel axes, and may have a spring-loaded lug which projects in the radial direction. The guides for the limbs may be arranged on the inner surface of the carrier walls, and the handle may also have a T-shaped grip with a limb which is guided in the middle of the carrier.

Abstract (de)

Die Erfindung bezieht sich auf einen als Flaschenträger oder Flaschenkasten ausgebildeten Behälter aus Kunststoff mit Mitteltragegriff, der höhenverschiebbar zwischen einer höchsten und einer tiefsten Stellung im Träger geführt ist. Die Erfindung besteht darin, daß der Griff zwischen seiner tiefsten Stellung und seiner höchsten Stellung mindestens eine Raststellung aufweist und gegebenenfalls darin, daß ein die Verschiebbarkeit begrenzender Anschlag beweglich und federbelastet ist. <IMAGE>
