Abstract (en)
[origin: EP0770741A1] The tile has a side groove (514) with an outer rib (513), which is bent into the shape of a connecting rib (5134) in the direction of the centre of the tile, in order to create a cutting (485,487) at the corner between the foot and the groove. It has a dip on the side which is nearest to the foot, and also has a rail (5131,5151) which ends at the corner cutting. The outer rib runs as a rail (5131) from the foot side of the connecting rib to the corner cutting, and ends at the cutting together with the other rail (5151), and a corner groove (5136) which forms the dip. The latter groove may also have the same depth and or breadth as the side groove.
