Abstract (en)
[origin: WO9510394A1] A pair of circlip pliers, for mounting or dismounting of circlips, comprising two jaws each having a first side (11, 13) arranged to be pressed against a hole of an end of the circlip during deformation of the circlip for mounting or dismounting purposes. The first side (11, 13) of each jaw is provided with a non-symmetrical waist (16) forming a part of a rational surface having an axis (17) of symmetry spaced from the axis (18) of the jaw and that the distance is so large that no undercut arises at the contour of the second side (12, 14).
