Abstract (en)

[origin: WO9602451A1] The invention concerns a method and a device for preparing the beginning (53) of a paper web feed roll (18) for changing rolls in motion. The paper web feed roll can be inserted either at a central location or at the roll-changer of each rotary press, and simultaneously a plurality of adhesive labels (67) can be stuck onto the beginning (53) of a paper web (20). According to the invention, the device has an operating carriage (22) which is movable in a frame (1) and which comprises an adhesive strip dispenser (93) in addition to a transverse cutting arrangement (61) and an adhesive label dispenser (66).
