Abstract (en)  
[origin: US5778297A] PCT No. PCT/DE95/00604 Sec. 371 Date May 20, 1996 Sec. 102(e) Date May 20, 1996 PCT Filed May 8, 1995 PCT Pub. No. WO96/02871 PCT Pub. Date Feb. 1, 1996An electrographic printer device is designed for printing tape-shaped recording media (10) with different tape widths in different operating modes such as single-color and multi-color simplex printing, single-color and multi-color duplex printing and for simultaneous printing of two recording medium webs in parallel operation. It comprises a module-like device structure with a printer module having a means for generating toner images arranged therein. A single fixing station (18) is arranged above this means. Via a deflection means (28), the recording medium (10) is supplied in single-color or multi-color duplex mode to a return channel (38) that contains a turn-over station (30).
