Abstract (en)

[origin: EP0771894A1] A guide member arranged on the end of a suction duct so that fly waste generated during winding can be effectively recovered. On the end of a suction duct (3A,3B) of a cleaning device (1), a fly waste suction hole (3a) and a guide member (3b) attached as a complete unit to the end of the surface of the suction duct (3) comprising the fly waste suction hole (3a) are arranged. The guide member (3b) is attached so that it follows along the surface of the floor (F). The fly waste suction hole (3a) of the present embodiment is circular and the guide member (3b) forms a circular board arranged concentric with the fly waste suction hole (3a). <IMAGE>
