Abstract (en)

An overcurrent fuse comprises a thin metallisation layer (3) applied on to a carrier sheet (2), the metallisation layer (3) being contacted by means of metal layers (4,5) formed by the Schoop flame-spraying or electro-spraying process. More specifically the fuse is formed from a stack of metallised carrier sheet layers, the metallisation being aluminium.

Abstract (de)

Eine Überstromsicherung (1) besteht aus einer dünnen Metallisierung (3), die auf eine Trägerfolie (2) aufgebracht ist. Die Metallisierung (3) ist durch Schoopschichten (4,5) kontaktiert. <IMAGE>
