Abstract (en)
[origin: WO9702168A1] An articulated bridge for a gangway between two vehicle parts or vehicles linked to each other in an articulated manner has several floor plates and sliding plates held by supporting elements in a movable manner in relation to each other. The sliding and floor plates (2, 3) are mounted on the supporting elements (4) in such a way that they can move in a parallel direction to the longitudinal axis of the supporting elements (4). The supporting elements (4) are secured to the vehicle parts or vehicles (5, 6) linked to each other in an articulated manner.
