Abstract (en)
[origin: US6092933A] PCT No. PCT/EP95/00057 Sec. 371 Date Apr. 16, 1997 Sec. 102(e) Date Apr. 16, 1997 PCT Filed Jan. 9, 1995 PCT Pub. No. WO95/33663 PCT Pub. Date Dec. 14, 1995A free-standing bag made of a heat-sealable or weldable plastic material and used for receiving therein liquids and/or pastes, said bag comprising two side walls connected to each other along their longitudinal edges, a foldable bottom element, which is disposed between said side walls and which serves as a supporting base, being inserted between the bottom transverse edges, whereas in the area of the other ends of said side walls a foldable lid element, which is disposed between said side walls, is inserted, and further comprising a discharge opening. In order to improve the handling characteristics of the free-standing bag when the contents are being poured out and in order to ensure also ease of manufacture, the discharge opening is formed between the upper transverse edge of a side wall and the complementary edge of the lid element.
