Abstract (en)
[origin: DE4426963A1] In order to allow an energy accumulator (20) mounted in a key (1) for high power consumers to be recharged without contact, said energy accumulator (20) is connected to a transponder (22) integrated in the key (1) and the high frequency pulses received by a sending and receiving part (26) of the transponder (22) are used to recharge the energy accumulator (20).
