Abstract (en)
[origin: GB2292213A] A plug for a radiator which is a pressing of sheet metal, comprises an externally threaded (15a) tubular body portion for engagement with a complementary screw thread in an aperture in a radiator. A head portion (13, Figure 1e) is adapted to be engaged by a driving tool for screwing the body portion into the aperture in the radiator. The plug has a formation (14) for receiving a seal element comprising a radially outwardly extending annular flange which receives an O-ring in use. The plug may also comprise a tubular portion for receiving a bleed valve member - embodiment of figure 2i. <IMAGE>
