Abstract (en)  
[origin: EP0772977A2] A dry mix for preparing a slush beverage. When the dry mix is dissolved in water at a 15% solids level, the liquid has an onset melting point greater than -6.5 DEG C and a viscosity of less than 10 mPas at 14.7 DEG C. The mix contains at least 2% of water-soluble, low-viscosity hydrocolloid and preferably contains insoluble particles to function as an ice crystal nucleating agent.
