Abstract (en)
The fire extinguisher has a control system (4,5) mounted on its body (2) and locked by a pin (11). The pin has an extension (11b) covering the nut (3) fastening the control system to the body. Alternatively, the control system is mounted on the first extinguisher body by a ring with a series of grooves. The pin has one or more lugs which engage with the grooves and prevent the ring from being rotated. A loop (14) with a lead or plastic seal serves to indicate when the pin has been moved.

Abstract (fr)
Dispositif de manoeuvre d'un extincteur du type comprenant un système de commande (4, 5, 6, 7, 12) monté sur un réservoir (2) et verrouillable au moyen d'une goupille (11), caractérisé en ce que ladite goupille est apte à empêcher la manoeuvre des moyens de fixation (3) dudit système de commande sur ledit réservoir. La goupille comprend une extension (11b) apte à couvrir au moins l'un des écrous de fixation de la platine (4) du système de commande sur le réservoir. <IMAGE>
